- Post Man

WORK EXPERIENCE

Trellisys.net Pvt Ltd | Jul 2022 - Present
Role: Front-end Developer
Project: YellowDays -Version-2
- A new online activity marketplace makes it easy to create and provide activities for children.
- In the newer version of the application, I utilized **Next js, Material UI, and React Full Calendar** along with **React Date Picker, Google Maps API, and Socket.io**.Providing a more streamlined user interface. Additionally, I implemented an admin access feature to grant authorized users specific administrative functionalities, enhancing overall control and management of the application.

Project: YellowDays -Version-1
- I developed the client side of a project using **Next.js, Tailwind CSS, Headless UI, React Date Picker, Google Maps API, and Socket.**io. The project aimed to create a platform where providers could offer activities for customers to book via a mobile application. I implemented features such as booking status tracking and chat functionality to enhance communication between providers and customers.

Samarth Meditech Pvt Ltd | Jan 2020 - Jul 2022
Role: Front-end Developer
Project: Web application for the Warehouse Management system
- I worked on the client-side development of warehouse management software using modern frameworks and libraries such as **React.js and React-Bootstrap**. I also created **hybrid** mobile applications using **PWA** technology with **Next.js**. The software includes an admin dashboard for managing accounts, employees, purchases, sales, and order tracking.

Project: Software for Homeopathy
- I developed a user-friendly Homeopathy software that enhances efficiency in Homeopathy organizations. It offers role-based features for easy task management, eliminating paper records through digital documentation. The front end is built using modern technologies like **React.js and Tailwind CSS.**

Sathvik Softech | Aug 2019 - Dec 2019
Role: Web Developer Intern
- Learned how to minify code and built some part modules using HTML, CSS, and JS
- Develop and follow best practices and development standards

BLH HItech Pvt Ltd
Role: Design Engineer   **| Nov 2018 - Jul 2019**
- Documenting requirements and designing the workflow process of Mobile and Web applications.
- Working with the development team in implementation and testing.
